📁 Portfolio

Profile Summary

- Data Analyst with hands-on experience analyzing structured datasets using SQL, Advanced Excel, Python, and Power BI, with a strong foundation in data cleaning, exploratory data analysis, reporting, and visualization.
- Skilled in MySQL, Pandas, NumPy, DAX, and Power Query for data transformation, KPI reporting, dashboard development, trend analysis, and generating actionable insights.
- Built self-driven projects in Power BI, SQL, and Python involving bank loan analysis, relational database analysis, and cricket performance analytics, supported by prior software development training.

Relevant Coursework

- Data Integrity
- Data Cleaning
- Data Visualization
- Exploratory Data Analysis
- Data Manipulation
- Dashboard Development
- Advanced Excel
- Generative AI

Experience

Software Engineer Trainee

Mar 2025 – Aug 2025

Serenus Technologies Solutions Pvt Ltd

- Participated in structured software development training covering frontend development, backend fundamentals, databases, REST APIs, and **version control**.
- Gained hands-on practice with React, JavaScript, HTML, CSS, Flask, **SQL**, REST APIs, Git, and GitHub through training exercises and practice projects.
- Built training projects including an Employee Management System and an E-commerce application to strengthen CRUD operations, **database connectivity**, API integration, and application development concepts.

Projects

Bank Loan Analysis Dashboard — Excel, Power BI, DAX, Power Query

Aug 2026

- Cleaned, transformed, and modeled bank loan data in Power BI for interactive analysis and reporting. Created **DAX measures and KPIs** to analyze loan applications, funded amounts, received amounts, average interest rates, and loan performance. Developed interactive dashboards using charts, slicers, and filters to analyze loan trends, loan status, borrower characteristics, and business performance.

Library Management System — SQL, Joins, Exploration, Cleaning

Jun 2026

- Designed and analyzed a relational library database involving books, members, issue records, and return records using **MySQL**. Applied JOINS, GROUP BY, HAVING, aggregate functions, subqueries, and date-based filtering to generate **analytical reports**. Analyzed book availability, member activity, rental pricing, issued books, returned books, and overdue records using SQL queries.

IPL Cricket Data Analytics — Python, Pandas, Analysis, Visualization,

Sep 2026

- Analyzed player and team performance using Python, Pandas, NumPy, and Matplotlib on a structured cricket dataset. Calculated strike rates and performed grouping, aggregation, filtering, sorting, ranking, and season-wise comparisons to identify performance trends. **Created bar, line, and pie charts to visualize player runs**, strike rates, team performance, and season-level analysis, and exported results to CSV.

Technical Skills

Analytical Tools: Excel, Power BI, Power Query, Tableau

Languages: Python, SQL

Technologies/Frameworks: GitHub, Jupyter Notebook, MySQL Workbench, Microsoft Excel

Education

Rajiv Gandhi Institute of Technology

Aug 2019 – July 2023

Bachelor of Engineering - CGPA: 7.5

Bengaluru, Karnataka

Certification

Data Analytics

Besant Technologies Marathalli, Bangalore

- Comprehensive training covering Advanced Excel, SQL, Python, Power BI, Tableau and Generative AI concepts.
